SUMMARY

Motivated frontend developer with a computing background and hands-on experience building responsive web interfaces and application prototypes. Skilled in modern JavaScript frameworks, UI/UX principles, and web performance optimization. Passionate about intuitive user experiences and scalable applications.

SKILLS

Skills: Responsive Design, UI/UX, REST API Integration, Component Architecture, Performance Optimization
Languages: JavaScript, Python, Java, C++, C#, SQL
Frontend: HTML5, CSS3, React, Next.js, Figma, Wireframing
Technologies: Git, VS Code, PostgreSQL, MySQL, Unity Engine

EXPERIENCE

- 2024 - Present **UI/UX & Frontend Developer Trainee** ArcLogi Pvt Ltd., Baneswor, Nepal
- Working on end-to-end UI/UX design and frontend development using React and Next.js for client-facing web applications.
 - Designing intuitive interfaces in Figma and translating them into responsive, production-ready components.
 - Collaborating with senior developers and project leads to deliver features aligned with client requirements and deadlines.
- 2023 - 2024 **Junior Frontend Developer (Freelance)** Self-Employed, Remote
- Designed and delivered responsive landing pages and business websites for small local clients using React and Next.js.
 - Gathered client requirements, iterated on Figma designs, and delivered pixel-focused frontend implementations.
 - Integrated third-party APIs including payment gateways and contact form services into client projects.
- 2022 - 2023 **Frontend Developer (Trainee)** Personal Development Projects
- Developed responsive websites using HTML, CSS, JavaScript, React, and Next.js while practicing reusable component patterns.
 - Practiced building reusable components with clean structure and maintainable frontend conventions.
 - Implemented modern UI layouts and REST API integrations across multiple prototypes.
- 2021 - 2022 **Software Developer Intern** Practical Learning Projects
- Built small web and desktop applications using Python and Java to reinforce core development skills.
 - Implemented CRUD systems with MySQL and PostgreSQL databases for data-driven applications.
 - Improved debugging, testing, and code organization practices through structured project work.

EDUCATION

- 2018 - 2021 **BSc (Hons) Computing** Islington College, Kathmandu
- Computing coursework with applied projects in web development, databases, software design, and practical engineering workflows.

PROJECTS

- 3D Arcade Game** - Unity & C#
Designed and developed an arcade-style game with interactive scoring mechanics, responsive controls, and polished game physics.
- Sports Center Booking System** - Python
Built a web-based booking and scheduling platform for sports facilities with availability management and structured reservation flows.
- Gym Management System** - Java
Developed a desktop application for managing memberships, tracking subscriptions, and generating operational reports.
- Machine Learning App** - Python, NumPy
Created a prediction prototype using machine learning algorithms and NumPy-based data processing for practical insights.
- Personal Portfolio Website** - React, Next.js, CSS3
Built a responsive portfolio showcasing projects and skills, with smooth animations, dark/light mode, lazy loading, and SEO-focused page structure.
- E-Commerce Product UI Clone** - React, REST API, Figma
Recreated a storefront UI with pixel-focused components, product listings, filters, cart state management, and mock REST API integration.
